

New single: “Je Ne Peux Pas T'Oublier” (Long Version)

Release date: March 20, 2026

Over 50 years ago, a love story began between a young student from Switzerland and a young student from France. Two people who met at a wedding, wrote letters, and fell in love - in a time without email and smartphones, when words on paper held a special magic. But geographical and cultural distance put an end to the relationship. An *amour fou*.

The autobiographical chanson “**Je Ne Peux Pas T'Oublier**” by **LUNA & The Gents** tells this story with great emotional depth. After previously only appearing on the EP “Second Life (Part I),” the long version is now being released as a **standalone single**. This version has become a particular favorite with listeners - the intense response was the decisive reason for the band to give the song even more space.

In the long version, the chanson unfolds with particular intensity: LUNA's expressive voice gains additional nuances, while her Gents carry the song with a transparent, sensitive sound. As with all of the band's productions, the track was recorded **live in the studio** without the use of instrument plugins or samples – apart from classic tools such as reverb, compression, and equalizers. The result is an authentic, timeless sound that creates intimacy and touches the listener.
